COVID-19 MFN Product Examples

HS Code	HSDescription	Product Description	Example of 10-digit HS w/ MFN Duty Rate	Relationship to COVID	Product Photograph
3914.00	Ion-exchangers based on polymers	Chromatography resin media	3914.00.6000 3.9%	Key consumable in isolating biological particles necessary in COVID-19 vaccine production	3917.40	Plastic fittings	Plastic connectors and fittings for single-use fluid handling systems	3917.40.0090 5.3%	Used by pharmaceutical and biotech companies during the development and manufacture of vaccines used to treat viral diseases including COVID-19	
6909.19	Ceramic wares for laboratory, chemical or other technical uses: Other	Ceramic ball bearings are used in the manufacture of single-use bioreactor and mixer bags.	6909.19.5010 4.0%	Used by pharma and biotech during development and manufacture of vaccines including COVID-19	7017.20	Laboratory, hygienic or pharmaceutical glassware	Glass columns prepacked with chromatography media	7017.20.0000 6.7%	Key consumable in isolating biological particles necessary in COVID-19 vaccine production. Pre-packaged columns act as modular units in high-production biopharma chromatography processes	
7019.90	Glass fibers: Other	Borosilicate glass microfiber filter papers.	7019.90.5040 4.3%	Used in biopharma laboratory and manufacturing applications including COVID-19 vaccine research and production	
8480.71	Injection or compression types: Other injection types	Injection Mold	8480.71.8045 3.1%	Used in manufacturing production of cartridges for COVID-19 molecular diagnostic testing kits.	8544.42	Insulated wire, cable or other electric conductors fitted with connectors	Parts for laboratory centrifuge	8544.42.9090 2.6%	Centrifuges are used to separate viral loaded cells for virus treatment research including COVID-19
